

Solution Architecture

Team ID	PNT2022TMID22950
Project Name	University Admit Eligibility Predictor

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the software's structure, characteristics, behavior, and other aspects to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
